

ENERGY MANAGEMENT FOR FACILITIES MANAGERS

The Energy Management for Facilities Managers course is for professionals who manage buildings and facilities day-to-day. It was prepared with the help of the Facilities Management Association of New Zealand and offers training in energy management, focusing on the ways that building systems can make the most efficient use of resources.

Learn how to manage your property's energy use and gain a better understanding of the ways to manage and mitigate unnecessary energy use. Hear how to make the building perform more efficiently which can lead to substantial short and long term energy and cost savings.

Who will benefit most from this training?

The course has been designed for commercial / office building facilities and maintenance managers, as well as property owners and property managers, who want to better understand the energy savings opportunities available and the strategies to implement them.

Attendee Feedback

"The training venue at Christchurch Airport was good and the opportunity to look at part of HVAC installed systems was valuable. The course covers a wide range of technical areas but well adapted to differing backgrounds."

"The course is very relevant to my job. The content is both thorough and broad. The manual is excellent to take back to the workplace."
