

Business Case Basics

This one day workshop focuses on understanding how to present the financial benefits of a project and is designed to help you get projects “over the line”. Equally applicable to consultants and in-house energy managers, it covers the basics of putting together a compelling case to secure finance for projects and achieving that all too elusive green light for your proposal.

Commercial Skills Development

This course is designed to help members win, satisfy and retain clients and increase rates of proposal acceptance. It is targeted at developing relationship building skills and understanding how to create value for clients. This programme runs in two blocks. The first is a two-day workshop to cover the core content of the course and establish peer development partnerships with other participants.
